

ADOMA

JEWELRY MANUFACTURER FOR BRANDS

BANGKOK

Are you looking for the ideal
Manufacturer?

Now you have
FOUND it

Identity

ADOMA is a family company, founded in 1988 as a German-Thai joint venture. We offer a full manufacturing service for high-quality jewelry.

Both, the German and the Thai families, hail from several generations of exquisite jewelry-making tradition.

This heritage explains our feeling for the beauty of fine handcrafts and our dedication to the prominence of our international clients.

Policy

ADOMA follows a strict policy of confidentiality. We keep confidential both the name and any sketches or models of our partners.

We do not distribute a collection of our own. In contrast to other manufacturers, we are not a competitor of our clients' brand but rather a part of it. Our craftsmanship lends the brand a compelling charm and the distinctive aura of luxury.

Benefits

ADOMA and its clients work in a close partnership. Both share the common goal of having the maximum success for the brand in the market.

While our clients concentrate on the marketing, ADOMA supplies reliable manufacturing, providing:

- A sense of style, quality and beauty to give each piece of jewelry a unique character
- Support with design development
- Creative solutions to translate our clients' ideas into the final product
- Careful gemstone selection, preparation and matching
- High standards in craftsmanship, production technologies and quality control

Values

ADOMA is managed by a young and innovative generation. In our daily work, we all attach great importance to trust, reliability, fairness, and team spirit.

These values are also the basis for the cooperation with all of our partners – values our customers can rely on.
